Activation of the Wound Environment

Dynamic Dressings

Wound Issue

Granulated, Static Wound	Failure to Heal	Necrotic

Topical Care Objective

Biological Support	Enhance Tissue Growth	Remove NonvitalTissue

Product Category / Type

Granulated, Static Wound → Biological Support
- Growth Factors
- Apligraf
- Dermagraft
- Oasis
- Allograft

Failure to Heal → Enhance Tissue Growth

MMP Inhibitors
- Polyhydrogenated Ionogen
- Oxidized Regenerated Cellulose

- NPWT
- Hyoluronic Acid
- Maltodextrin
- Papain-Urea Copper Chlorophyllin
- Collagen
- Trolamine sodium alginate

Necrotic → Remove NonvitalTissue

Debridement
- Autolytic
- Mechanical
- Sharp Instrument
- Larval Therapy

Enzymatic
- Papain-Urea
- Collagenase
