

JANUARY 2022 MONTHLY HBOT WEBINAR

NFPA Guidelines & SerenaGroup Quality Metrics & Measures

PRESENTED BY THE CLEVELAND
CLINIC | AKRON GENERAL

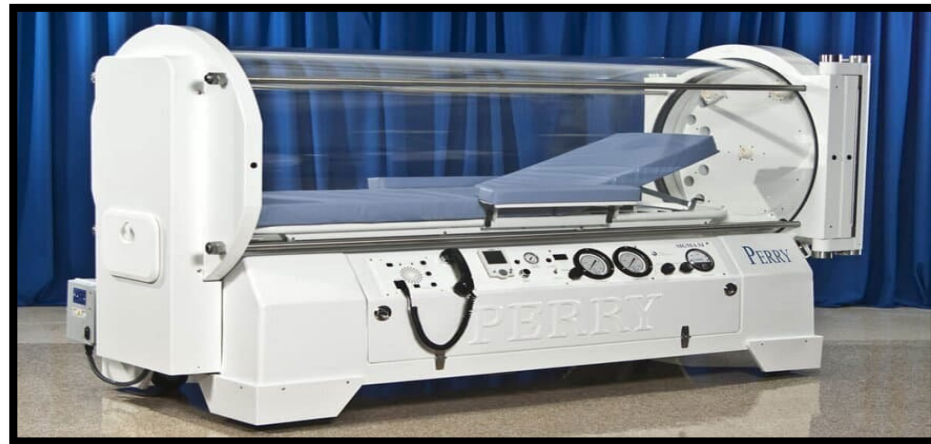

www.serenagroupinc.com

NFPA 14.2.5.2, NFPA 14.3.1.5.2, NFPA 14.3.1.5.4 & 4.1

- Class B chambers (monoplace) must be able to depressurize from 3 ATA to ambient pressure in less than 2 minutes.
 - This is confirmed in weekly safety chamber checks.
 - As well as in our annual timed fire drills.
 - All personnel is to be trained in all emergency procedures.

NFPA 14.2.8.2 – 2.1

- All units housing Hyperbaric Chamber are required to have a means of communication to notify the fire department.
- If the building housing the hyperbaric unit has a fire alarm system, the communication system must be a pull – station connected to the system.

NFPA 14.2.11.2.5

- The point of exhaust shall be labeled as an Oxygen exhaust.

Labeled “no open flame”

and “no smoking”

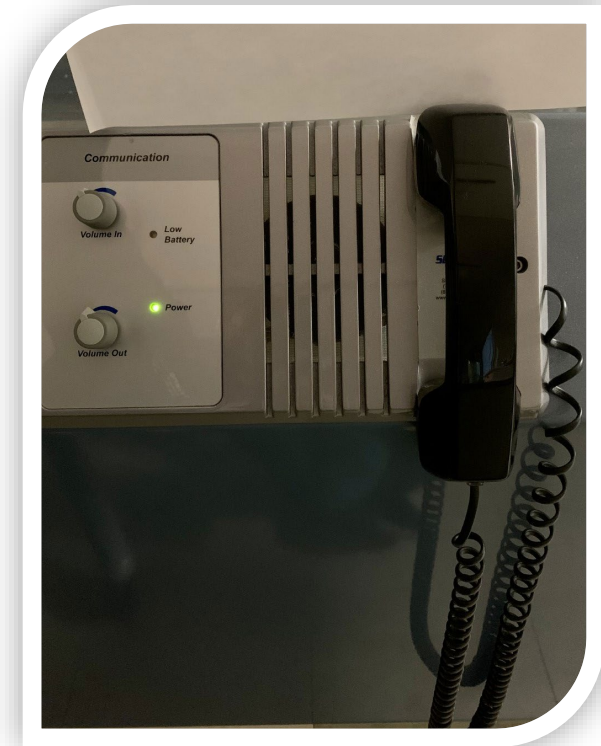

NFPA 14.3.1.3.2-2.3

- Each facility should have a designated on-site Hyperbaric safety Director that over sees equipment and requirements.
 - Participate in developing procedure.
 - Provide maintenance.
 - Participate in policy development.

NFPA 14.3.1.4.6

- When a chamber is occupied, the operator is to be **physically present at all times**.
 - Maintaining visual access
 - Maintaining audible contact

NFPA 14.3.1.6.1.3, NFPA 14.3.1.6.4.1 & 4.2, NFPA 14.3.1.6.5 & 5.2, NFPA 14.2.8.1

- Pretreatment checklist should be completed prior to ALL treatments.
- Have a displayed poster of prohibited items that are not to be introduced into the chamber.
 - Cotton garments provided by HBO tech only, are permitted.
 - Patient educated for the duration of treatments of things not allowed in chamber.
 - Patients subjected to pat downs.
 - No hair products, skin products or deodorants allowed.

“If god didn’t give it to you and I didn’t give it to you, you can’t take it in.”

~Tim Mayhugh~

HBO Poster
